COMPANY

Berizzi is an Italian company producing components and accessories for paint spraying and fluid handling with high quality standards at highly competitive prices.

Most of the company's products are available in stock in automated warehouses and are distributed worldwide thanks to a fast and reliable delivery service.

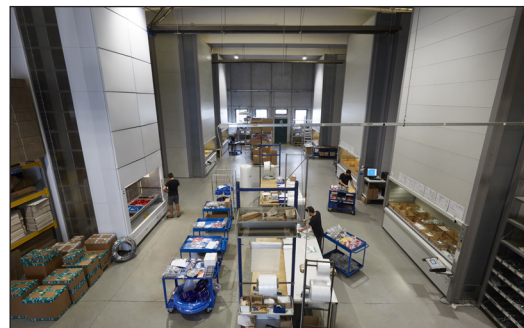

The company was established as **Filtermedia** in 1996 in **Calolziocorte**, Northern Italy. In 2020 Filtermedia became **Berizzi**, maintaining the same ownership and headquarters as well as its productive and organizational characteristics.

Backed by a long and consolidated industrial tradition and driven by an innovative technological culture which looks to the future, the company aims to meet the needs of its national and international customers.

In recent years, Berizzi has started a procedure of corporate certification according to the main international standards.

All processes and services are in fact certified in accordance with the **UNI EN ISO 9001: 2015** standard. For all products, Berizzi has acquired the most important certifications in the sector.
