Spécifications techniques

RILSAN HOSE x MATERIAL Technical-constructive features: rilsan hose Application: these hoses were created for the conduction of paints, oils, air, water-based fluids, foods, chemically aggressive fluids and steam. Working temperature: from -40° C to +80° C. For water-based fluids operating temperature +70° C. Temperature peaks: max +100° C. If the duration or frequency of the peaks is relevant, the service life of the pipe may be reduced. Specifications: DIN 73378 - DIN 74324

POLYURETHANE HOSE x AIR

Technical-constructive features: polyurethane's flexibility is comparable to rubber and has a good resistance to kinking. Application: these tubes were created for the conduction of air, food fluids, breathable air; suitable for pneumatics.

Working temperature: from -20° C to +60° C.

Specifications: product in compliance with FDA

21 CFR 177.2600 regulation. Row material in compliance with UE 10/2011 regulation.
