

RST₅

Automatic airless high pressure gun

CE  II 2GT6 X

Automatic high pressure airless spray gun with new design.

Super compact, 300 bar, 233 gr in aluminium version and 590 gr in stainless steel version, with minimum dimensions, it is one of the smallest automatic spray guns on the market. Thanks to its design it can be used on any robot, in systems with confined spaces and to perform colour change valves in series. Available in the aluminium or stainless steel version, it guarantees quality, precision and resistance for any type of work. The complete needle kit makes it very quick to replace the needle without having to adjust any stroke and above all without having to disassemble the gun from its support.

The self-adjusting packing gland guarantees extraordinary durability and resistance over time.
